

World Trade by Commodity Classes and Regions , in percent of total

In recent years, there have been changes in regional disaggregation concerning the European region and its sub-regions such as the European Union and EFTA. In order to allow for the maximum of information, past regional breakdowns are reported thereby accepting the interruption of complete time series.

World Trade by Commodity Classes and Regions , in percent of total

In recent years, there have been changes in regional disaggregation concerning the European region and its sub-regions such as the European Union and EFTA. In order to allow for the maximum of information, past regional breakdowns are reported thereby accepting the interruption of complete time series.
