Course Description

This mini-course will focus on the study of multinational activity and global value chain activity. We will discuss theoretical and empirical studies of the decisions to export and invest abroad, as well as recent developments at the intersection of the theory of international trade and the theory of the firm.

This course is targeted to second-year Ph.D. students in economics. Students are expected to have completed first-year micro and macro theory courses, and, ideally, an introductory graduate course in International Trade.
